

PROUDLY
FOUNDED IN N.Z.

BLIS Technologies was formed in 2001 by Professor John Tagg, from the Microbiology Department of Otago University.

Over 30 years of research into friendly probiotic bacteria led to Professor Tagg's discovery of *Streptococcus salivarius* K12 (BLIS K12™), the world's first advanced probiotic targeting the oral cavity and upper respiratory tract.

Today, BLIS Technologies continues to operate out of Dunedin, New Zealand, producing advanced oral probiotics that help protect the gateway to the body – the oral cavity.

Also available as ToothGuard Junior – advanced oral probiotics for kids

It's hard enough to get kids to brush their teeth, let alone to do a good job of it. Great tasting BLIS ToothGuard Junior has been developed specially for children, and when taken once daily provides great back up to their brushing. Ask for BLIS ToothGuard Junior at your pharmacy or dentist today.

TG Mini V1

The mouth is a constant battleground - on a daily basis, billions of invading bad bacteria attempt to displace the natural and beneficial bacteria of the mouth, teeth and gums.

Even on properly brushed teeth the bacteria that cause tooth decay and gum disease will find a place to hide.

This causes a change or imbalance of the normal bacteria in our mouths and can affect the health of our teeth and gums.

INTRODUCING BLIS:

BLIS M18™ is a new generation of advanced oral probiotics, developed from a special strain of beneficial bacteria called *Streptococcus salivarius* that is found to occur naturally in the healthy mouths of adults and children.

BLIS

M18™

BLIS M18 WORKS
IN 2 WAYS:

1. The "good" bacteria (BLIS M18) crowd out the bad bacteria responsible for cavities and gum disease.
2. BLIS M18 also inhibits bad bacteria, providing protection against them coming back. Think of it as a 'force-field' around your oral cavity.

ToothGuard with BLIS M18 has been scientifically developed to support the health of teeth and gums when used in conjunction with regular brushing.

BLIS ToothGuard is available from selected pharmacies and dentists nationwide
