

## Fischer's Ultrapak™ Packers

THIN SERRATED  
PACKING INSTRUMENTS

These specially designed packers ease the packing of Ultrapak™ knitted cord. Their thin edges and fine serrations press into the cord, preventing it from slipping off and reducing the risk of cutting the gingival attachment.

**45° TO HANDLE:** Our most popular packers, with heads at 45° to the handle and three packing sides. Circular packing of the prep can be completed without the need to flip the instrument end to end. Use the small packer on lower anteriors and upper lateral incisors.

**90° AND PARALLEL TO HANDLE:** Same size design as the 45° to handle packer, except one of the heads is in line with the shank and the other is at a right angle to the shank.

*"Ultrapak Packers help place the cords properly in a quick and efficient manner. Thanks to the inventors!"*

- 170 - Regular Packer - 45° to handle 1pk
- 174 - Small Packer - 90° to handle 1pk
- 172 - Regular Packer - 90° to handle 1pk

## Fischer's Slide Packers

THIN, CIRCULAR, NON-SERRATED  
PACKING INSTRUMENTS

These thin, non-serrated slide packers are designed to place and compress cord with a sliding action as the clinician places cord around the prep. The thin head presses into the cord, and the smooth, circular head allows placement of cord in a sliding motion around the preparation without lifting the instrument from the cord.
